Abhishek Ajit Walvekar

+1 (773) 991-2944 | walvekarabhishek701@gmail.com | linkedin.com/in/abhishek-walvekar | abhishekw.me

Technical Skills

Languages: Go, Java, Python, SQL, TypeScript, JavaScript (ES6)
Backend & Data: Spring Boot, Django, Node.js, Kafka, PostgreSQL, MongoDB, Redis
Cloud & DevOps: AWS (S3, Lambda, EMR, Bedrock), Kubernetes, Docker, CI/CD (GitHub Actions)
AI & Search: RAG pipelines, OpenSearch, pgvector, LangChain, LangGraph
Frontend: React, Angular, Tailwind CSS

Experience

Software Engineer, AI — Sep 2026 – Present
Layered AI Inc. — *Chicago, IL (Remote)*
- Test end-to-end latency on production AI agent calls and recommend fixes, cutting response time from over **2 s** to **1.5–1.7 s** so far, with a target of under **1.2 s**.
- Act as a forward deployed engineer, reaching out to prospective customers to understand their workflows and where AI agents fit.

Software Development Intern — Jun 2023 – Oct 2023
Drishti Software Solutions — *Kolhapur, India*
- Diagnosed sequential query patterns and missing indexes in an **Oracle Data Integrator** ETL pipeline; restructured jobs with batch processing and targeted indexes to improve ingestion throughput by **25%**.
- Added quantitative analysis features to a **Laboratory Information Management System**, cutting reporting turnaround by **15%**.

Full Stack Development Intern — Jun 2022 – Jul 2022
Mobileware Technologies Pvt Ltd — *Mumbai, India*
- Delivered a CEO-facing analytics dashboard with interactive KPI charts (**Angular**, **Apex Charts**); reduced weekly reporting turnaround time by **30%**.
- Implemented **Spring Boot** REST APIs backed by **MySQL** (CRUD + validation + error handling) for internal enterprise workflows.

Back-end Development Intern — Jan 2022 – Apr 2022
Cleverground Pvt Ltd — *Pune, India*
- Worked on backend services for analytics, live lectures, and notifications using **Django** and REST APIs.
- Triaged production issues and shipped fixes, reducing recurring backend bug reports by **20%**.

Projects

Zelyx | AI Proxy & Observability Platform | nexus-alpha-five-55.vercel.app
- **AI proxy** and observability platform that routed **LLM** calls through a self-hosted proxy, giving teams **real-time spend tracking** and full audit trails without touching existing application code.
- **Gate engine** enforced per-key **budget caps**, model allowlists, and **payment-risk signals**; non-compliant calls were blocked before they reached the provider.
- Built a **Next.js 15** dashboard with real-time cost, latency, token usage, and error breakdowns across teams, projects, and models.

FinSight | finsight-vh4y.onrender.com
- Built a grounded financial research agent over live SEC filings with a query router that checks an **XBRL** structured fact store first, falling back to hybrid **BM25** + dense retrieval, cutting LLM calls to only ambiguous queries.
- Designed a three-layer refusal system (retrieval similarity threshold, synthesis grounding rules, system prompt) so the agent declines rather than fabricates when the corpus doesn't support an answer.
- Built a three-layer eval suite scoring retrieval hit@k, gold-number and citation-grounding accuracy, and an **LLM**-judge pass, ensuring no answer ships without traceable evidence.

CodeContext MCP | github.com/Abhishek-701/codecontext-mcp
- Built a live-indexed codebase context server exposing five structured tools over **MCP** so LLM agents can query codebases that exceed context window limits.
- Implemented a file watcher with **watchdog** and debounce logic; used **tree-sitter** to parse Python and JavaScript files and extract symbols into **PostgreSQL**, with semantic search via **pgvector** and **sentence-transformers** alongside exact lookups.

Education

University of Illinois Chicago — Chicago, IL
Master of Science in Computer Science — GPA: 3.78/4.00 — *Aug 2024 – May 2026*

University of Mumbai — Mumbai, India
Bachelor of Engineering in Computer Engineering — GPA: 8.81/10 — *Aug 2019 – May 2023*
